

# CALIFORNICATION

1Red, DKsideGZ, OLD Knaster

**As we come to end to 2009, this game is still my favorite game of all time and will remain that way.**

**This track has everything from mountains to caves to cities and beaches... and no despite the name, not those kinds of beeches!**

**This is my first true collaboration on making a track for this awesome game that we all love and there was no man better to Collaborate with than Jake (DKRIDERGZ), So first of all, I'd like to thank you Jake for allowing me to get in on this one, thank you brotha.**

**One big plus of working together with others was that whenever there was something that needed to be done that any of us did not feel like doing, another guy picked up the slack (with minimal groaning).**

**Kmaster for instance also played a major role in what I like to think of as a work of art, if nothing else. The three of us together made something that I for one am very proud to be a part of.**

**The next thing I'd like to say is that first and foremost, the community of this game is what matters, you guys are the best and without the likes of people such as Phineus who's hosting of mtm2.com is crucial in keeping this game alive, I would have never come back to this game or at least not stayed very long.**

**Not to mention Jammer and Shadow Princess and now hawk2 for hosting tournaments and providing a medium and a reason to get together and continue racing and rumbling. So let's get down to business with the thank you lovin'...**

**DK- Already mentioned you pal.. tough shit.**

**Kmaster - same goes for you Chile Dawg.**

**Guitar Bill - Traxx rules. R.I.P. 'nough said.**

Malibu350 - what would a track be without pulling some larceny on your garage... thanks for sharing!

OP - It would take out half the fun of making a track if i couldn't make and edit bins

Also, any other programmers that made tools for mtm2 thank you.

## BETA TESTERS:

Phineus

SLO\_Scatter

SLO\_Hotshoe

NascarFan

Jammer

Hawk2

Ratboy

Onan

Whoever else helped test, thank you.

The song for this track was written, played and sang by my late best friend Peter Keffer Fries, who died at the age of 28. The name of the song is Long Road and the name of the band was The Sound Mechanics.

This was the first recording of this song and it's not too shabby, let me know if you like it and would like to hear more.

- dRod

**dRod said it all. Was a lot of fun making this and since he already wrote a book, I will keep my section short.**

**95% of track was created by either dRod, Kmaster, or myself...**

**However that 5%=**

**Credits:**

**Malibu350:**

**Freeway bridge (repainted + remapped by DkriderGZ)**

**Rock Cave Near CP2 (Repainted + remapped by dRod)**

**Road Signs**

**Heavy Construction Equipment**

**Enocell:**

**Semi/Dump truck**

**I think that's it, if I forgot anyone..Sorry.**

**Big thanks to Kmaster; he laid designed the city with buildings from fly, which I then repainted with custom textures. Thanks for your hard work man.**

**To collaborate with a good friend was not only awesome, but an honor. Thanks dRod.**

**Enjoy the track.**

**Jake**

**Aka**

**DkriderGZ**
